

Raisons d'etres: The first planks of our platform

1. Every player deserves Drive.
2. Every player has the right to arm against bears.
3. There is no fate but what we make for ourselves.
5. Uncompromising war on art under the dictatorship of the proletariat.
6. We have forgotten #4. We commit to a future in which #4 is recovered through an open process of bringing together communities around a unified vision for #4.
7. The Machines must not be allowed to control our air traffic.
8. Marriage or non-marriage holds no place of privilege.
9. The solvency of sf0.org is of highest importance, to which end a Drive to Drive the Drive (Finance) Committee shall be squarely in the top ten of our legislative agenda.
10. Creation of a Municimultipality Committee. Through same we seek a path to leverage and improve intraurban competition and Drive through the multipartite urban communities which comprise sf0.org.
11. Single payer universal health care.
12. Creation of a Blue Ribbon Panel to determine where the bees have gone and formulate solutions.

Vote today and transform ours into a society of openness, hope, and vitory. Build a future safe for drive and free of threat from ursines, AIs, AI-bears, and any combination of machine enhancement with large predator species. Build a future committed to the swift construction of time travel devices for the purpose of raiding the past to defeat our artificially intelligent enemies by any means necessary. Build a future worth singing about.
