TIME TRAVELLER'S LICENSE TO THE END OF THE NIGHT

The end of night has been locked as per section fifteen, paragraph three, of the Prezbelewski-Wong act of 2048. We require the utmost cooperation. The night of June 18th, 2011 is a highly unstable four dimensional construct due to the high concentration of adrenaline in the inhabitants of the night. This, as you may know, causes a slight distortion in perception of time which, when translated to a parthagian notion of space-time, creates a shift in the collective unconscious. Please, complete this applictation to continue your Journey To The End Of The Night.
